

# Who Can Help You Grow Your Business Faster?

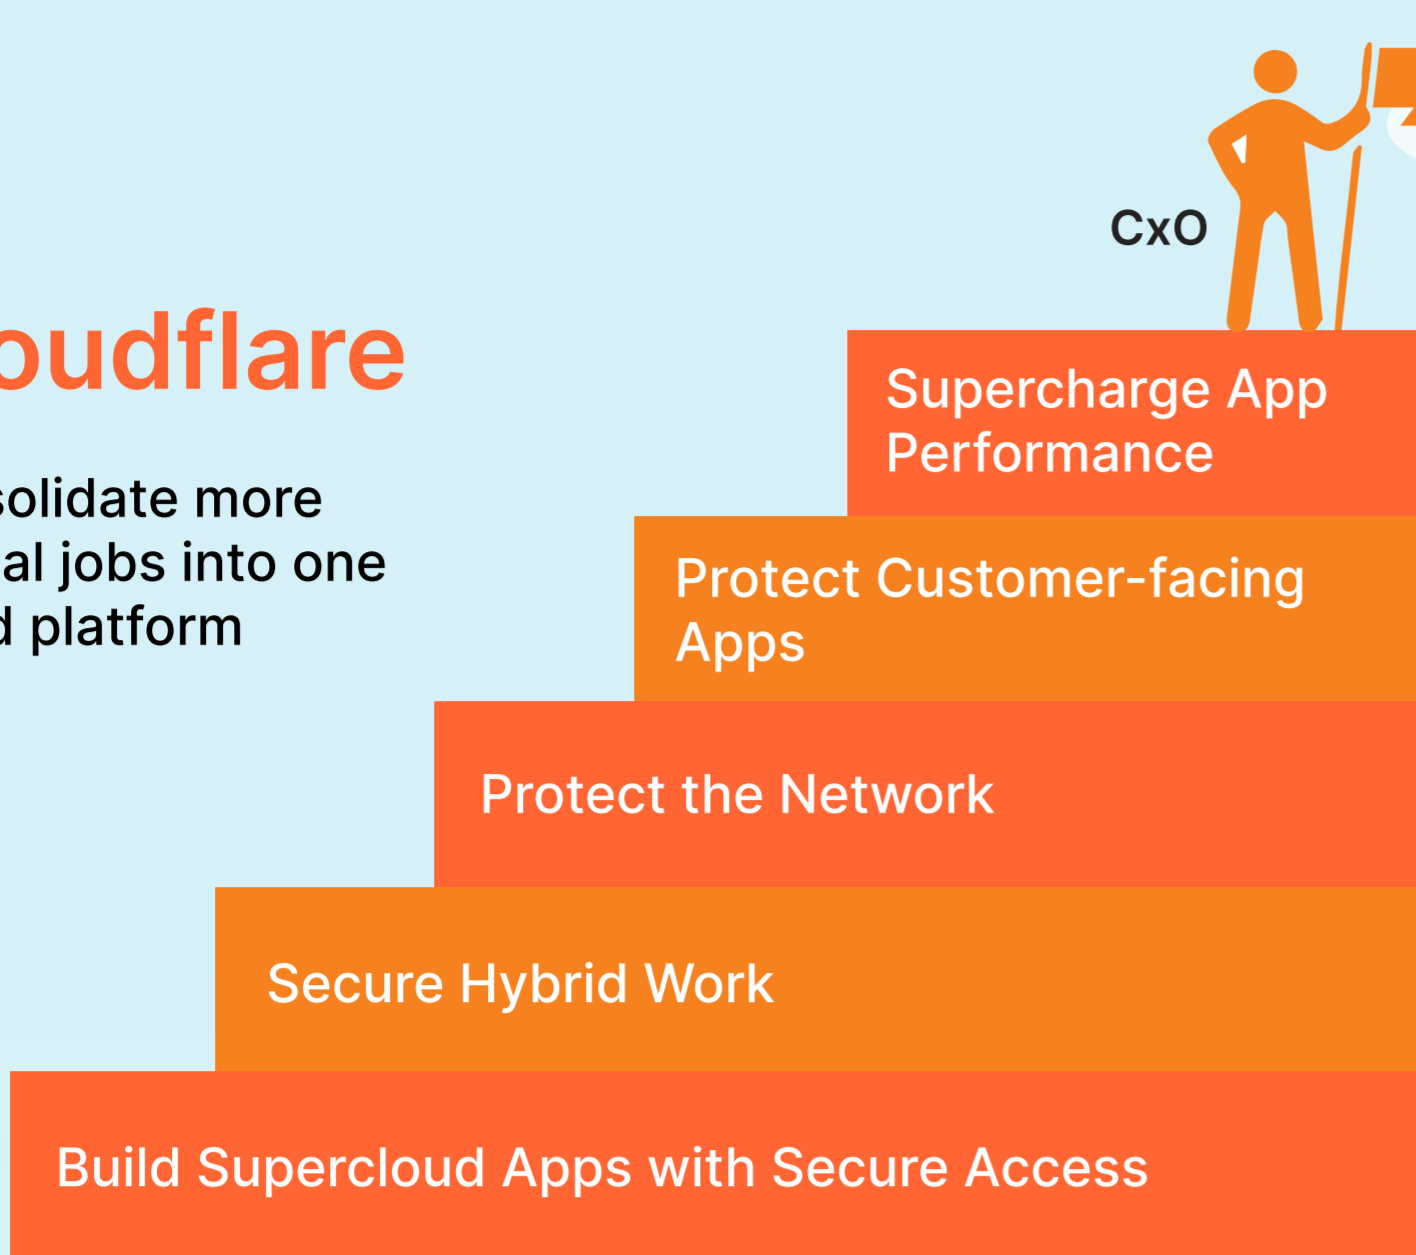

VS

## Cloudflare

Consolidate more critical jobs into one cloud platform

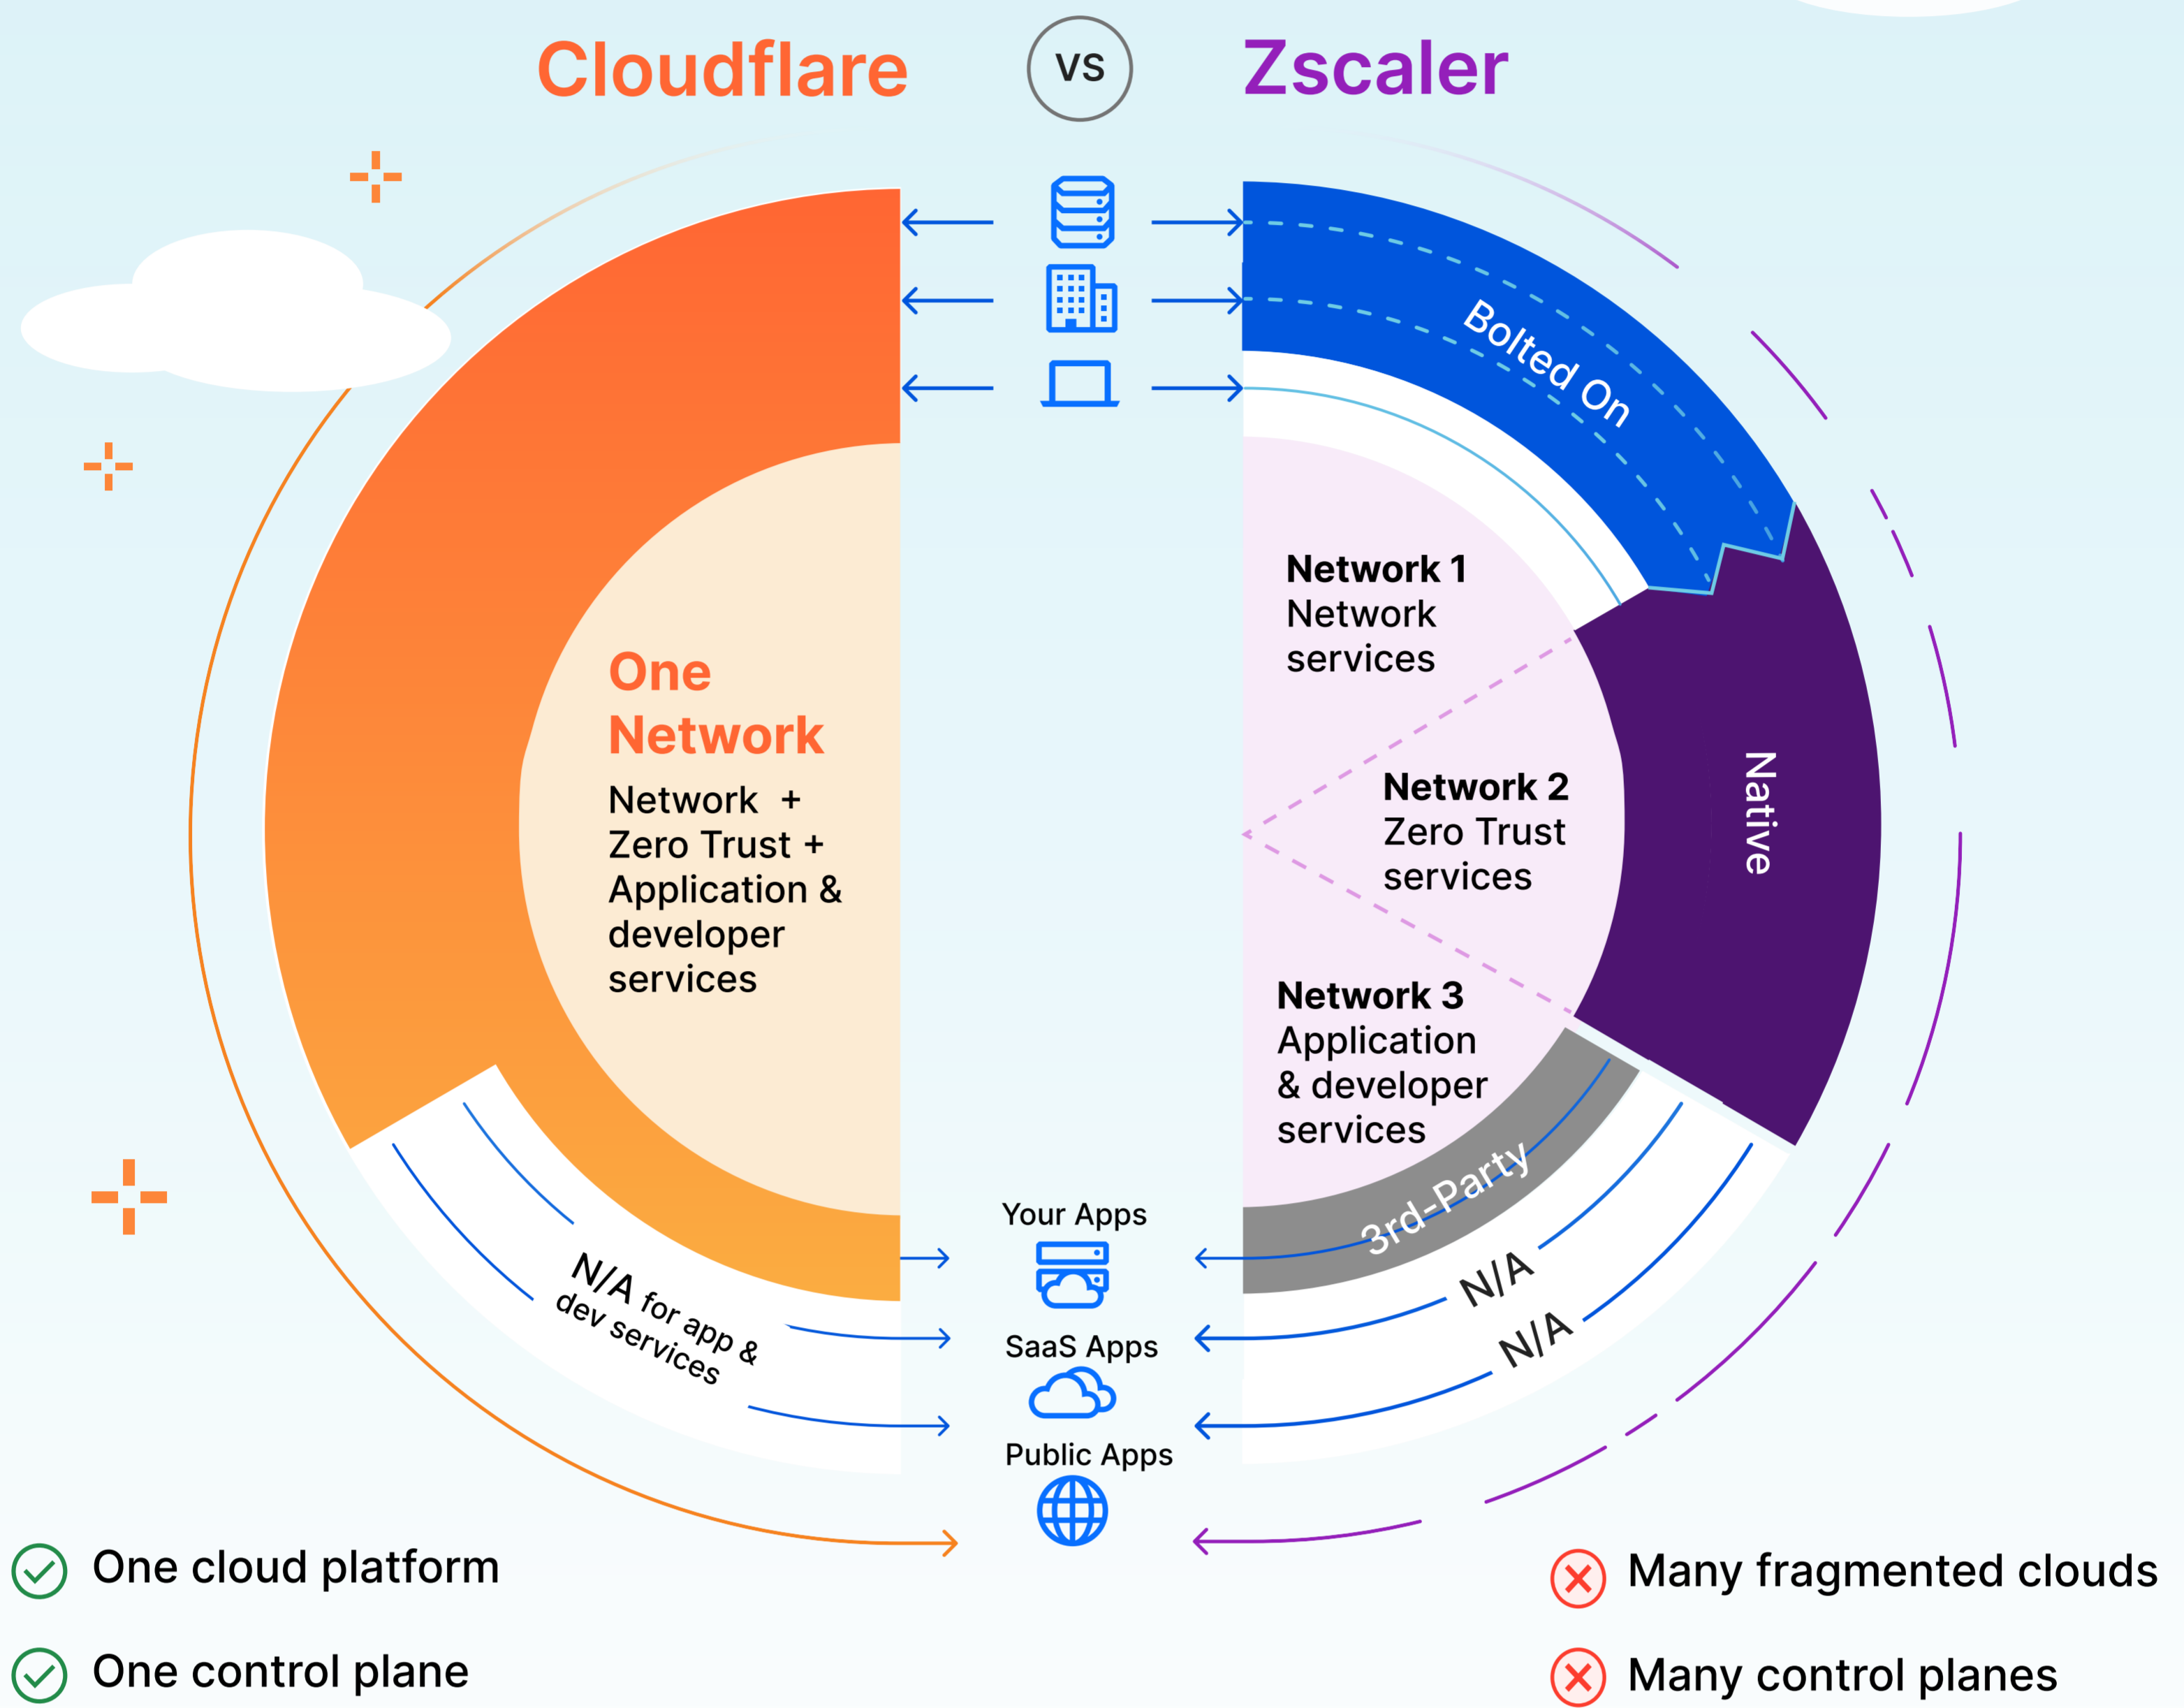

## Zscaler

Two point cloud solutions<sup>1</sup>

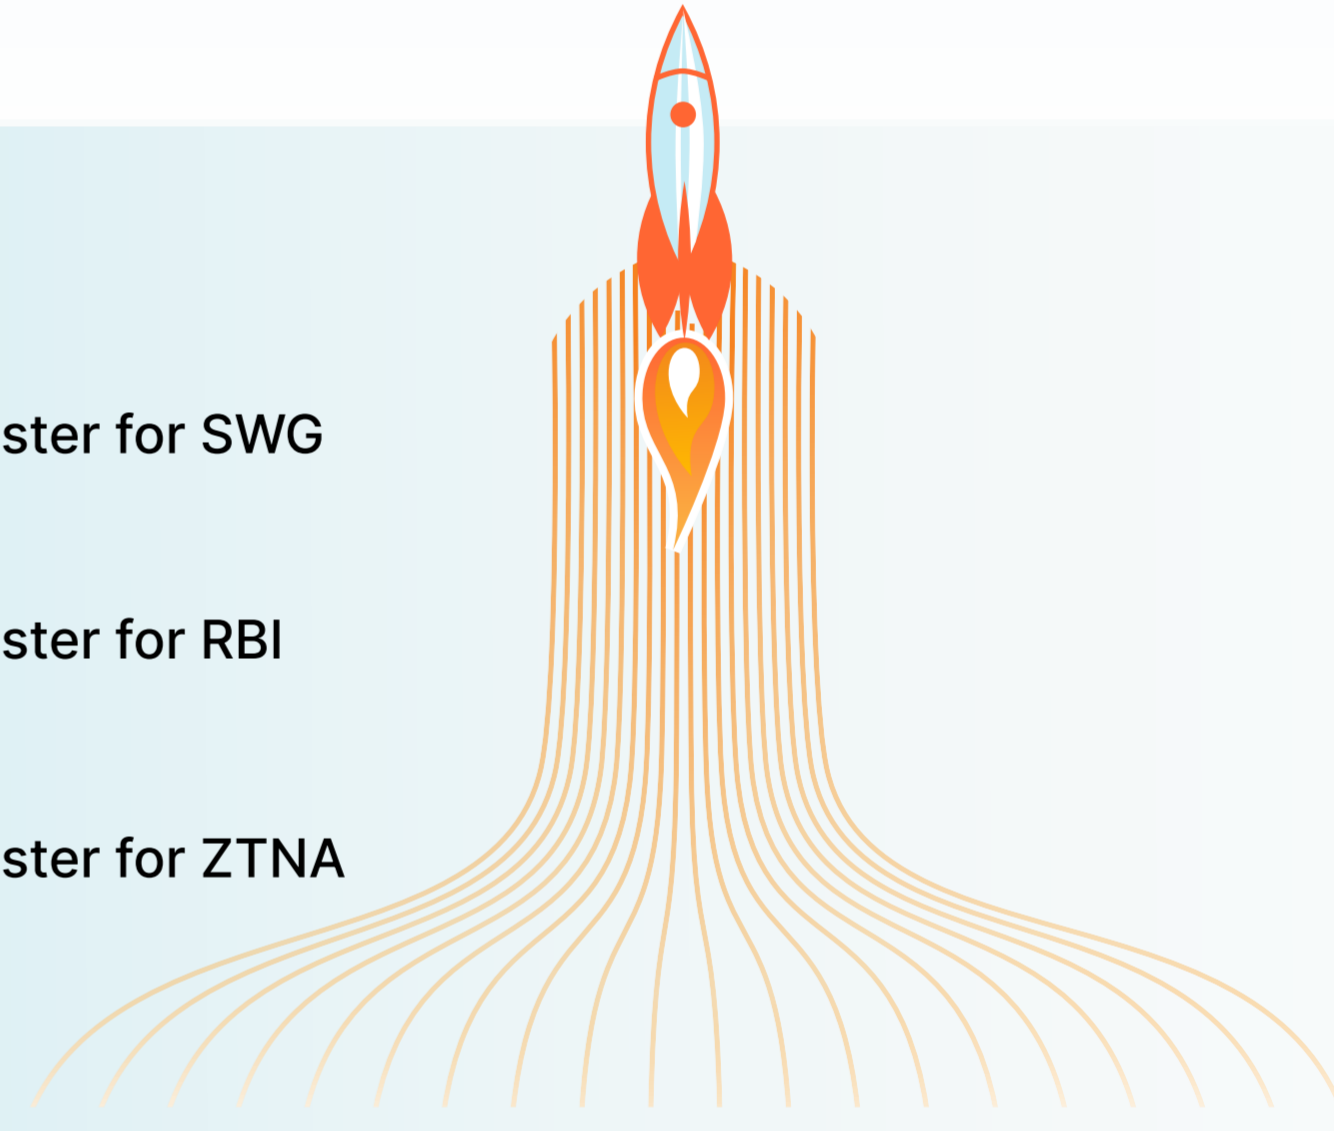

## Consolidate Point Solutions with Easier Setup and Operations

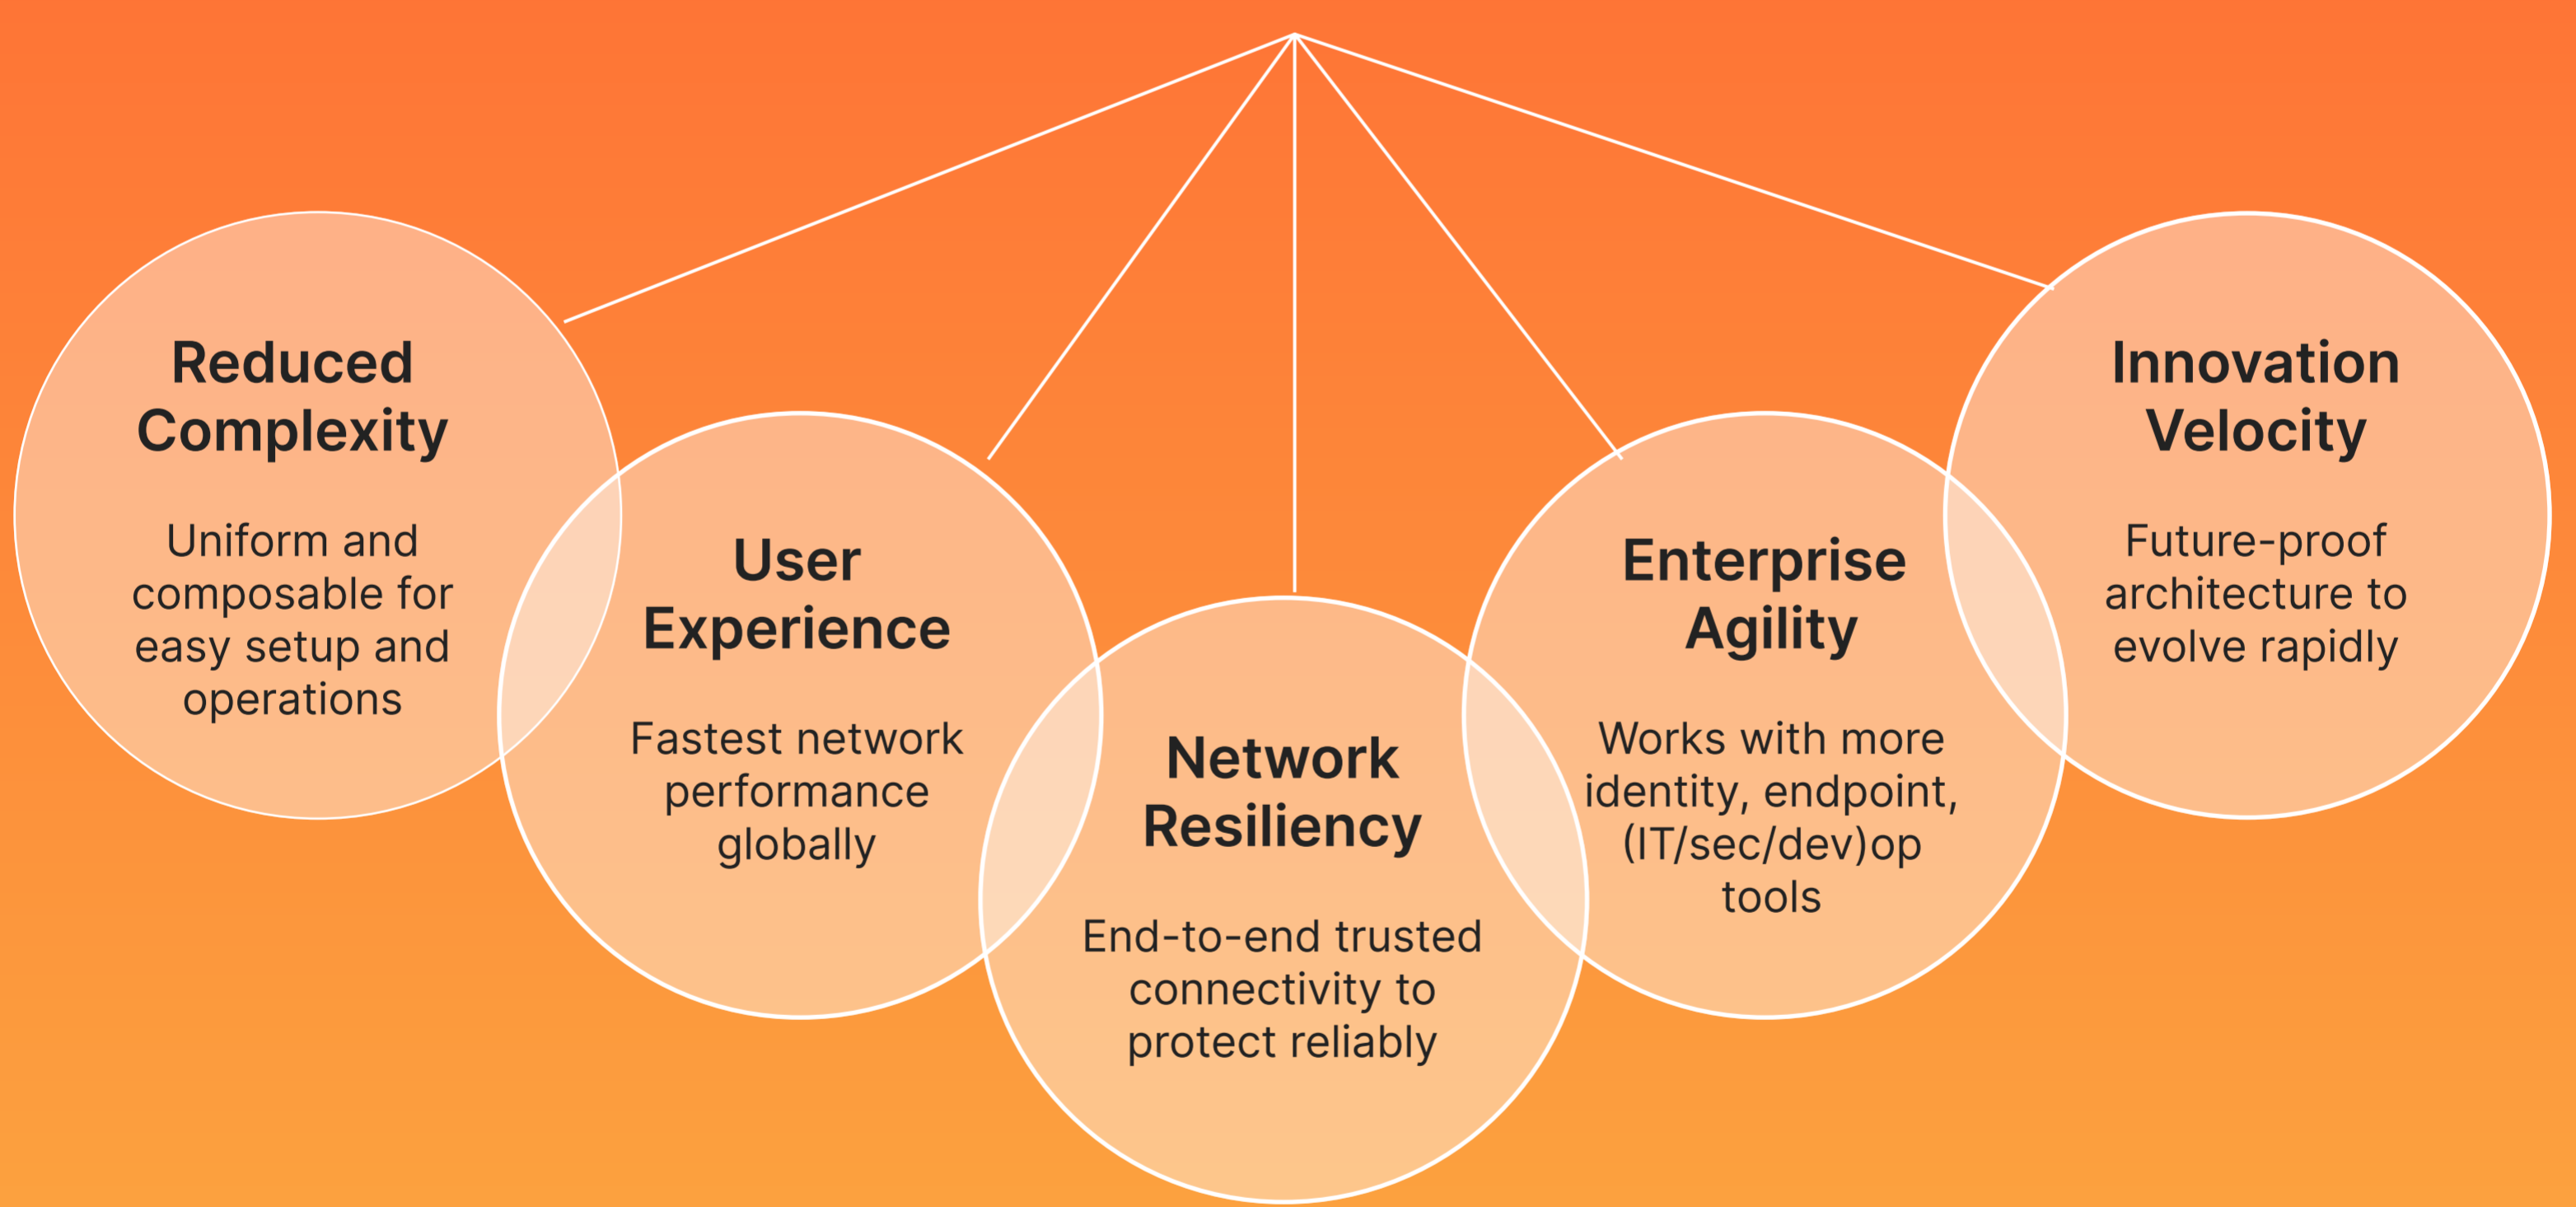

Cloudflare delivers a better user experience than Zscaler<sup>2</sup>

- 58%** faster for SWG
- 45%** faster for RBI
- 38%** faster for ZTNA

## To Secure Hybrid Work, Customers Choose Cloudflare over Zscaler for...

## Cloudflare's Larger Cloud Network Enables More Resiliency

**1000X**

More daily threats blocked than Zscaler (approx.)<sup>3</sup>

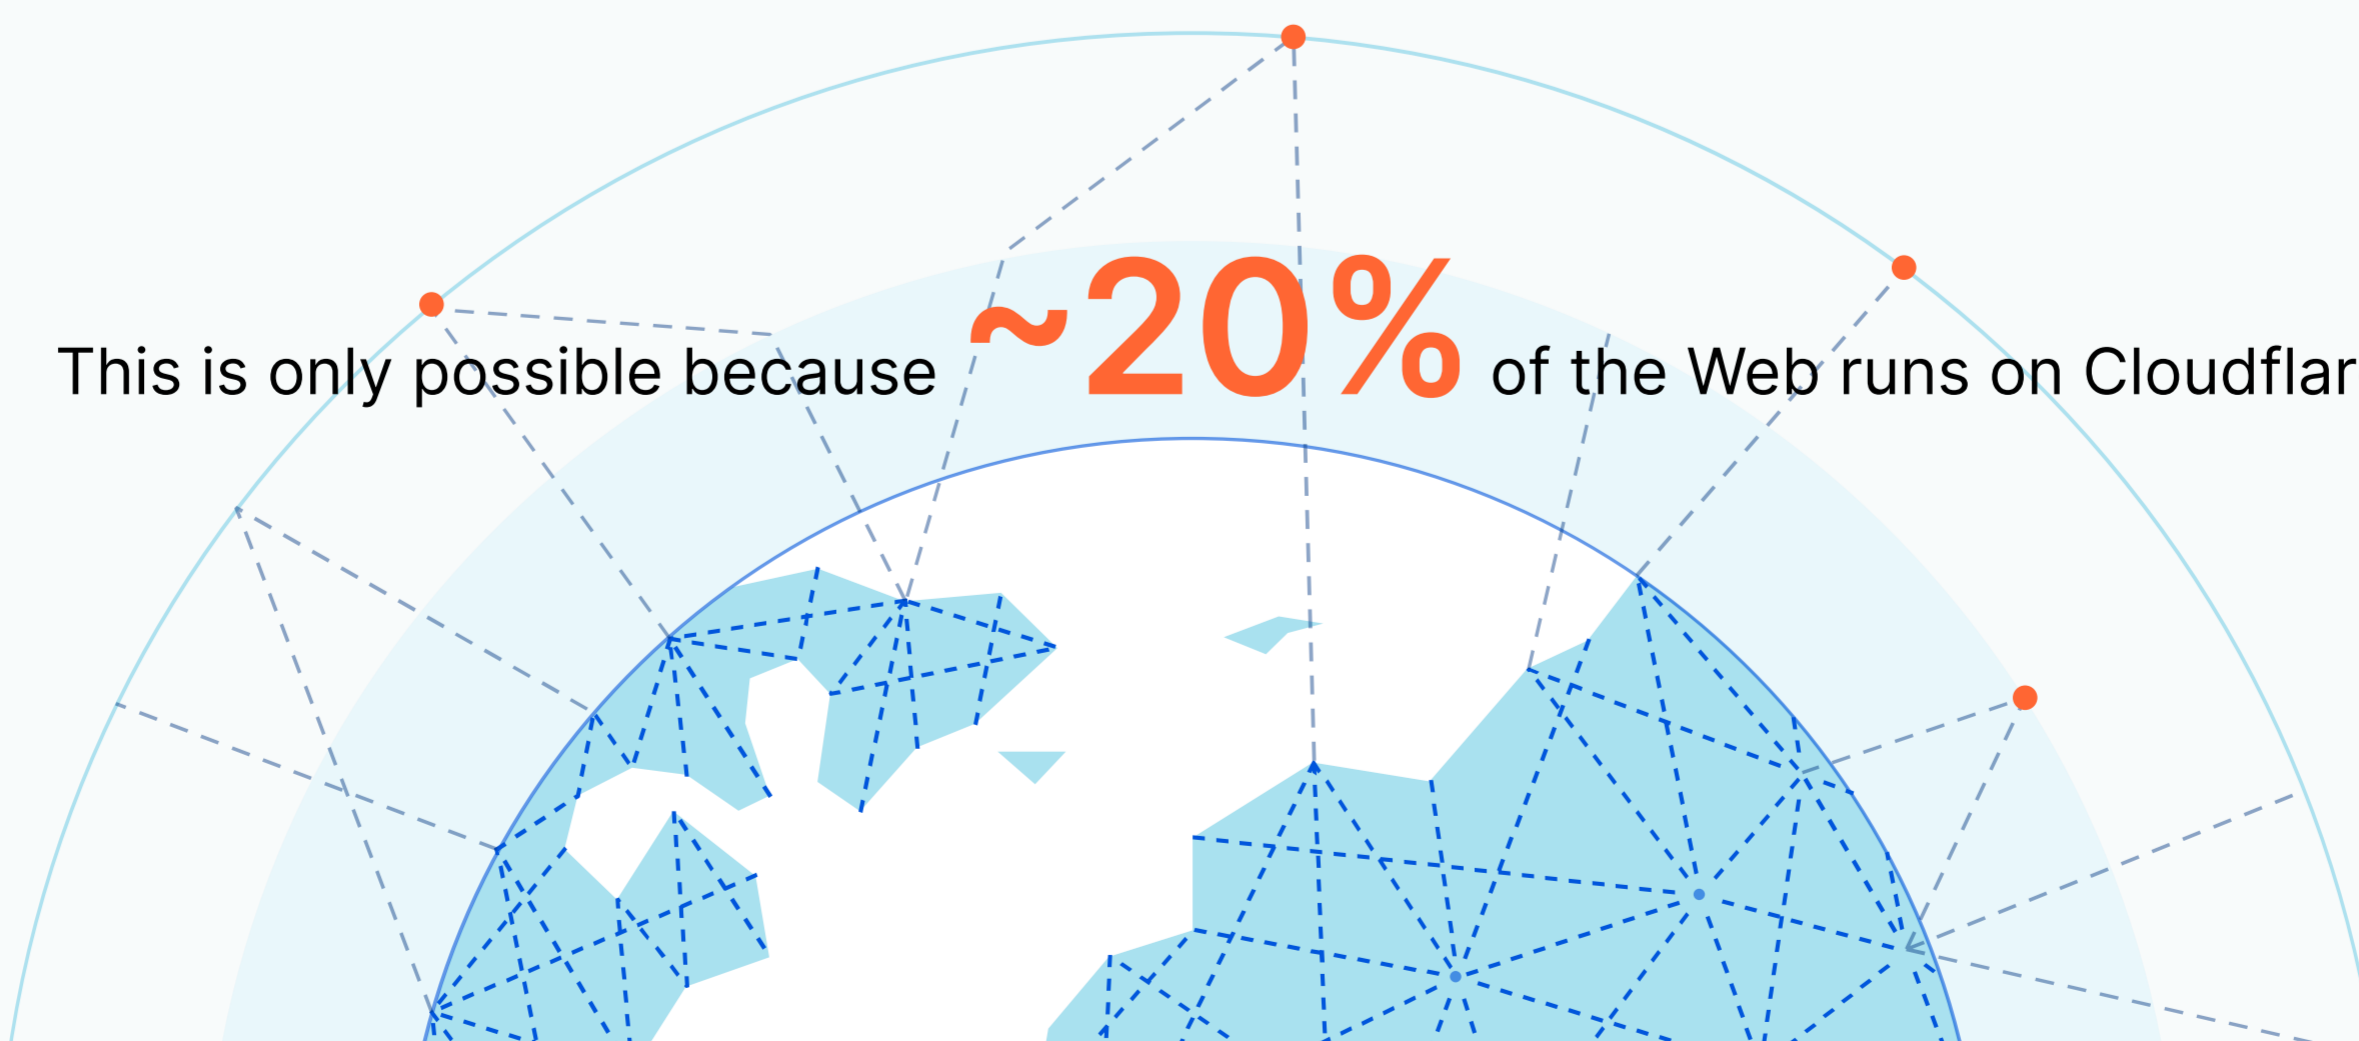

**95%**

of world's Internet users within 50ms of our network

**100%**

Uptime SLA

This is only possible because **~20%** of the Web runs on Cloudflare<sup>4</sup>

## Calculate Your ROI By Shifting to Cloudflare

Calculate ROI

Sources:

- ZIA, ZPA and ZDX secure hybrid work while ZCP protects public cloud.
- <https://blog.cloudflare.com/network-performance-update-cio-edition/>, SWG = Secure Web Gateway, RBI = Remote Browser Isolation, ZTNA = Zero Trust Network Access
- Cloudflare publicly claims to block 126B threats daily while Zscaler publicly claims to block 126M to 150M threats daily (<https://www.zscaler.com/resources/solution-briefs/zscaler-security-services.pdf>). Each metric may be defined differently per vendor.
