## Take your network to the next level

CloudFlare helps you get more out of your business. Our service protects your customers and your infrastructure from a range of Internet threats and makes your customers' websites faster. From DNS to security and performance, CloudFlare offers you the flexibility and choice to help you meet your customers' needs.

## Getting started as a partner

CloudFlare will be with you to provide support and guidance every step of the way.

## Cache the uncacheable with Railgun™

As a CloudFlare partner, you get access to Railgun, our dynamic content acceleration technology free of charge. Railgun uses advanced network optimization to ensure your customers' content is delivered as fast as possible. Using delta compression, Railgun achieves a 99.6% compression ratio, which results in a 140% additional performance boost for website visitors. Normally, CloudFlare customers pay \$200 per month or more for access to this technology.

## Become a partner today

Getting started is easy with our plugins for cPanel, WHMCS, Odin Automation, Plesk, or via API. Offer CloudFlare to your customers through your control panel, online store, or billing system — customers can turn it on with just a few clicks. Plus, our reseller program gives you the opportunity to drive additional revenue through custom plans.
